Explore Drones

Tech File

Global warming causes the sea ice to melt. It increases the risk of forest fires and it even affects the temperature in coral reefs.

Our climate is changing. Data shows that the world is getting warmer. This is called global warming and it affects the world around us.

Polluting gases, such as carbon dioxide, produced from planes, cars and lorries, add to global warming.

Governments and other organisations are investigating how technology can be used to combat global warming.

Drones are one type of technology that can help us reduce the effect pollution has on global warming.

Drones come in all shapes and sizes. They can hover using their rotors.

They don't need fuel to work so they don't create pollution in the same way that other forms of transport do. This makes drones much better for the environment.

Drones can be used to deliver medicines to hospitals and patients.

They are also being used to deliver food and parcels in some parts of the world.

Drones are quick, agile and can travel to hard-to-reach places.

Drones are also used in industries such as building and farming. They can drop seed pods so that new trees will grow. They can also be used to scan and identify unhealthy plants.

Safe Searching Disclaimer: This unit involves children searching on the Internet. Please be mindful of search terms/topics used and connotations that could result in inappropriate links and pages. Child-friendly search engines are advised. Ensure your firewall settings are set at the appropriate levels necessary and your antivirus software is up to date. It is good practice to ensure screen content can be seen at all times and that children know what to do if they see something on the Internet that makes them feel uncomfortable.

Did You Know...?

Drones are even being used as eyes in the sky to track and monitor endangered animals. Just one more way they are benefiting our planet!

What Can You Do?

Research the other types of technology that are being developed to tackle global warming. Make a report to tell your class all about it.
