

Objects of the Future

Think about an object that you use all the time. It could be a games console, a bike or a phone. What do you think has changed about that object since it was first created? How has it adapted to work better? Use the space below to draw and write about what you think the object might look like in the future, using the prompts to help you. Don't forget to add labels. Make sure that you have watched the Tech We Can video lesson on **Tech for the Future (Part 1)** before you start.

Bigger?

Smaller?

Thinner?

Faster?

Use this space to write about your object and the changes that you think might happen to your object in the future.

The object is a

The object's main purpose is

I think that in the future, the object will

I think that these changes will happen because

I think that these changes will be good/bad because

I think the object's main purpose will be
