

# Design a VR Game

Design your own toy or game using the space below. Your toy must interact with a computer program or app so that there is a technology element, but other than that the only limit is your imagination! Don't forget to add labels. Make sure that you have watched the Tech We Can video lesson on **Tech for Toys** before you start.

## Toy Design

## Programme or App Design

Now that you have designed your toy and the companion programme or app that goes with it, describe how your game will work here.

You can use these questions to prompt you:

- What is the game called?
- How does the programme or app work?
- How do you play the game?
- What are the controls?
- What is the aim of the game?
- Who do you think would like to play this game?

A large writing area with horizontal lines, a pencil icon at the top right, and a battery icon at the bottom left.
