

Life on Mars

Technology already does an amazing job helping us to travel into space and even allows astronauts to live out on space stations. We have already landed rovers on Mars to explore the planet and the next step is to start to think about the possibilities for sustaining life there. Use this template to design a plan for surviving and thriving on Mars, with a focus on how technology can help us. Each section is left intentionally blank so that you can either write or draw your thoughts, or a mix of both. Make sure that you have watched the Tech We Can video lesson on **Tech for Space** before you start.

If we lived on Mars, how could technology help us to:

Eat and drink?

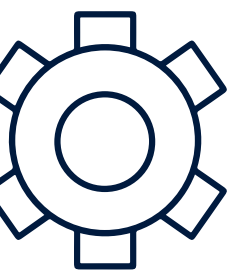

Sleep?

Breathe?

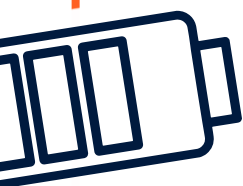

Stay clean?

Stay safe?

Communicate?

Exercise?

Travel?

Any Other Ideas

We hope you find the information on our website and resources useful. As far as possible, the contents of this resource are reflective of current professional research. However, please be aware that every child is different and information can quickly become out of date.
