

Biometric Protection

In this activity you will be challenged to come up with inventive ways that technology can be used to keep your personal and private data safe. Each box has a heading and you will need to write or draw a way to protect it. Maybe you want to create a mobile phone that only unlocks when it hears your voice. Make sure that you have watched the Tech We Can video lesson on **Tech for Safety and Security** before you start.

Ways technology can help to protect:

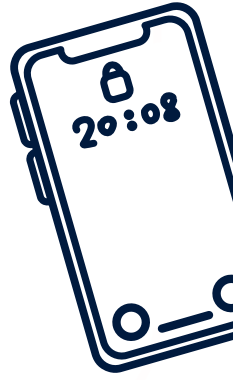

Your passwords

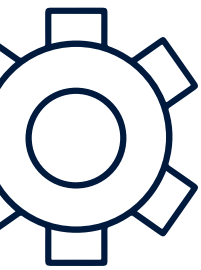

Your photographs

Your mobile phone

Your bank account

Your location

We hope you find the information on our website and resources useful. As far as possible, the contents of this resource are reflective of current professional research. However, please be aware that every child is different and information can quickly become out of date. The information given here is intended for general guidance purposes only and may not apply to your specific situation.
